EDUCATION

Indian Institute of Information Technology Bhopal
B.Tech Electronics and Communication **GPA: 8.62**

Bhopal, Madhya Pradesh
Nov 2022 - Jun-2026

EXPERIENCE

Google | *Software Developer*

Oct, 2023 - Nov, 2024

- Developed a scalable microservice using **Go** and **gRPC** to handle high-throughput data processing, improving system efficiency by 25%.
- Implemented automated testing frameworks with **JUnit** and **Mockito**, significantly reducing bug occurrences by 30% prior to deployment.
- Collaborated with cross-functional teams to integrate new features into existing platforms, ensuring seamless user experience and maintaining robust codebases.

Amazon | *Software Developer*

Jan, 2025 - Present

- Developed and deployed a new feature using **Java** and **Spring Boot**, resulting in a 15% increase in user engagement.
- Optimized database queries for a critical service, reducing latency by 20% and improving system performance.
- Collaborated with product and design teams to gather requirements and deliver robust software solutions on time.

PROJECTS

Talk-To-Code | *NextJs, TypeScript, Postgres, Langchain, GeminiAI*

[Live](#) [Github](#)

- Built a **RAG** based web app using **Next.js** and **Postgres**, letting users input any GitHub URL and chat contextually with the entire codebase.
- Automated repo content fetching using **Github API**, generated embeddings with the **Gemini** model and stored them in a **Postgres** vector database for quick semantic search and file-specific results.
- Integrated **LangChain** for text-splitting, chunking, retrieval, and context handling, ensuring accurate responses with precise file paths, using **Postgres** and **Gemini AI** in a robust pipeline.

CodeX | *ReactJS, NodeJS, TypeScript, RTK Query, Shadcn UI*

[Live](#) [Github](#)

- Built an online code compiler supporting Python, Javascript, Java code compilation, along with mini web interface that enables the execution of HTML, CSS, and JavaScript to compile webpages.
- Devised the backend using **NodeJS**, leveraging child processes for secure and isolated code execution, an authorization for user management and code storage, with **MongoDB** for efficient data persistence
- Developed the front-end using **React**, integrating **Redux** for state management and **RTK Query** for API data fetching and caching, reducing API call latency by **90%** and improving data retrieval efficiency

ShareFun | *ReactJS, NodeJS, ExpressJS, MongoDB, Tailwind*

[Live](#) [Github](#)

- Developed a full-stack social media platform using **MERN** stack with features including post creation, liking, comments, and secure user authentication with password recovery with help of email and OTP
- Built the backend with **NodeJS** and **ExpressJS**, using **MongoDB** for data storage and Cloudinary to optimize image storage costs and implementing JWT cookie-based authentication for secure access
- Created the frontend using ReactJS and Tailwind CSS, leveraging Redux Toolkit Query for efficient state management and caching, boosting API response time by **80%**

SKILLS

Languages: C/C++, JavaScript, TypeScript, Python, SQL, Object-Oriented Programming (OOP)
Technologies: ReactJS, NextJS, NodeJS, ExpressJS, Streamlit, Flask, MongoDB, MySQL, ChromaDB
Libraries: LangChain, Vector-store, Redux, Redux-toolkit, RTK-Query, Web-Sockets
Platforms: Git, Github, Gitbash, Visual Studio Code, Postman, Vercel

ACHIEVEMENTS

- **3-star** on [CodeChef](#) (**max rating 1659**)
- **Pupil** on [Codeforces](#) (**max rating 1340**)
- [Leetcode](#) **max rating 1849** with a global rank of **436** in weekly contest 419 made under **10%** globally
- Solved more than 1000 problems on Leetcode, codechef, codeforces combined
- Teaching Assistant for Database Management System (DBMS) at IIIT BHOPAL
